Place: Pune

Date :10/12/2013

**Dr. B. T. Lawani**

M. S. W., M.Phil, Ph.D.

***Research Guide***

# ACKNOWLEDGEMENTS

I should acknowledge that the completion of this study was made possible due to the kind of help and guidance offered to me by number of persons to whom I owe my sincere thanks.

First and foremost, I am profoundly grateful to my research guide, Dr. B.T.Lawani, Bharati Vidyapeeth University, for sparing his valuable time to guide me at every stage of this study. In spite of his busy schedule he found time to discuss with me the content of each chapter and very useful suggestions which broadened my outlook. He is source of a great inspiration for all ups and down while pursuing the Ph.D. course. It was, indeed, a privilege to work under such a person.

I wish to acknowledge my gratitude also to the teaching and non-teaching staff of the social sciences center for their co-operation and help.

If I have managed to get reliable and valuable information and data for my study, it was due to the whole hearted cooperation extended to me by all the authorities and the respondents of the various institutes who shared with me their feeling and emotions with patient and tolerance. I sincerely express my warm gratitude to them.

I express my sincere gratitude's to the renowned psychiatrist of Maharashtra Dr Shailesh Chagule, Dr Hemant Chandorkar, Dr Ulash Luktuke who guided me in understanding the various concept of geriatric population. Professor Joshep Troisi Director International Institute on Ageing, United Nation –Malta (INIA), inspired me for the study.

I extend my gratitudes to the librarians of Gokhale Institute of Politics and Economics, Jayakar library, University of Pune. Library of Bharati Vidyapeeth's Social Sciences Center, British Library, Pune, etc. for making available books and journals whenever I needed.

I also take this opportunity to thank Mr Vasant Kanshitte and Sapana Patil for helping me in data collection and computing the data through the SPSS software.

For the enduring inspiration, encouragement and help I received from my parents and my brother, this work could never have been completed successfully.

I am especially thankful to my wife, Mrs. Deepali Kanshitte, who has been a continuous source of inspiration to me in all my academic endeavors.

There are many others who have helped me directly and indirectly. I am deeply grateful to all of them.

**Santosh Kanshitte**
