LIST OF TABLES

Sl. No.	TABLES	PAGE No.
1.	The frequency and percentage of demographic variables in experimental and control group	71
2.	Frequency and percentage of Perception of grief of mothers of children with selected chronic diseases in experimental and control group	79
3.	Frequency and percentage of Perception of grief of mothers of children having selected chronic diseases after planned intervention in experimental group	81
4.	Mean and standard deviation of mothers score regarding the areas of grief on RGEI, Experimental group	83
5.	Mean and standard deviation of mothers score regarding the areas of grief on RGEI, control group	84
6.	'Z' test for effectiveness of planned intervention on perception of grief of mothers of children having selected chronic diseases in Experimental group:	85
7.	Two sample 'Z' test for comparison of the change in perception of grief of mothers in experimental and control groups.	87
8	Frequency and Percentage of Coping strategies of mothers of children with selected chronic diseases in experimental and control group	90
9.	Frequency and percentage of Coping strategies of mothers of children having selected chronic diseases after planned	91

	intervention in experimental group	
10	Mean and SD of scores of coping strategies of experimental group	93
11	Mean and SD of scores of coping strategies of control group	94
12	'Z' test for effectiveness of planned intervention on coping strategies of mothers of children having selected chronic diseases in Experimental group	95
13	Two sample 'Z' test for comparison of the change in coping strategies of mothers in experimental and control groups	97
14	An analysis of data related to association of perception of grief and demographic variables of mothers	100
15	An analysis of data related to association of coping strategies and demographic variables of mothers	103
16.	Frequency and percentage of opinion regarding the Information booklet on Leukemia and Thallasemia	105
17	Frequency and percentage of opinion regarding Relaxation Therapy	106

LIST OF FIGURES

Sl. No.	FIGURES	PAGE No.
1	Conceptual frame work based on Roy Adaptation Model	19
2	Research design	54
3.	Bar diagram showing number of children	72
4	Bar diagram showing the diagnosis of the child	73
5	Bar diagram showing duration of illness	74
6	Bar diagram showing age of child	75
7	Bar diagram showing gender of child	76
8	Bar diagram showing occupation of mothers	77
9	Bar diagram showing the perception of grief of mothers having children with selected chronic diseases	80
10	Bar diagram showing the perception of grief of mothers having children with selected chronic diseases before and after planned interventions in experimental group	82
11	Bar diagram showing the comparison of pre and post perception of grief of mothers of children with selected chronic diseases (Experimental group)	86
12	Bar diagram showing the comparison of change in perception of grief of mothers of children having selected chronic diseases in experimental and control group	88
13	Bar diagram showing the coping strategies of mothers of children having selected chronic disease in experimental group.	92
14	Bar diagram showing the comparison of pre and post coping strategies of mothers of children having selected chronic diseases in experimental	96

	group.	
15	Bar diagram showing the average perception score v/s diagnosis	102
16	Bar diagram showing the average perception score v/s gender	102

LIST OF APPENDICES

Sl. No.	TITLE
1	Approval letter
2	Approval letter (Ethical committee)
3	Letter seeking permission to conduct the study
4	Certificate of Relaxation training
5	Letter requesting Validation of the tool
6	Certificate of Validation
7	List of Expertise for validating the tool
8	Data Collection tool (English)
9	Consent for experimental group (English)
10	Consent for control group (English)
11	Data Collection tool (Marathi)
12	Consent for experimental group (Marathi)
13	Consent for control group (Marathi)
14	Protocol of Relaxation Therapy

APPENDIX
