

5.4. LIMITATIONS

- The city of Pune as widely spread requires more time in travelling from one place to other place which becomes difficult.
- The sample of population where most of the residential area was targeted to collect data required prior permission to meet the respondents.
- The study has been conducted in professional couples where both husband and wife are supposed to fill in the questionnaire.
- The availability of both at the same time was difficult for most of the time.
- Couples took longer time to fill in the questionnaire due to their busy schedule.
